PROFILE

Software Engineer with 5+ years of experience building scalable, enterprise-grade web applications using PHP (Laravel, Symfony, CodeIgniter) and modern JavaScript technologies (Vue.js, React). Specialized in RESTful API design, relational database optimization, and robust backend architecture. Led technical initiatives that reduced onboarding time and established coding standards adopted across a 10-member development team. Recognized for translating complex business requirements into clean, maintainable, and high-performing systems that support long-term scalability.

PROFESSIONAL EXPERIENCE

05/2023 – Present
Trivandrum, Kerala

Software Engineer PIT Solutions

- Architect and develop enterprise-level web applications using PHP frameworks (Laravel, Symfony) and Pimcore
- Design and implement RESTful APIs that improved system integration efficiency by 40% and reduced data processing time
- Lead technical proof-of-concept initiatives for emerging technologies, resulting in 3 successful project implementations
- Establish and enforce coding standards and best practices, improving code quality metrics by 30% across development teams
- Mentor junior developers through code reviews and technical guidance, contributing to 50% reduction in development cycle time
- Collaborate with product managers and stakeholders to translate business requirements into technical specifications
- Optimize database queries and application performance, achieving 25% improvement in page load times

04/2022 – 04/2023
Trivandrum, Kerala

Junior Software Engineer Lean Transition Solutions

- Developed and maintained 6 dynamic web applications using PHP, Symfony, and MySQL with 99.5% uptime
- Implemented responsive frontend solutions using JavaScript, Bootstrap, and modern CSS frameworks
- Participated in agile development processes, consistently delivering features within sprint timelines
- Conducted thorough testing and debugging, reducing production bugs by 35% through systematic quality assurance
- Collaborated with UI/UX designers to create intuitive user interfaces that improved user engagement by 20%
- Integrated third-party APIs and services, enhancing application functionality and user experience
- Contributed to technical documentation and knowledge base, improving team onboarding efficiency

01/2021 – 10/2021
Trivandrum, Kerala

Junior Software Engineer
Acutro Technologies

- Built scalable web applications using PHP, CodeIgniter, and MySQL
- Developed interactive user interfaces with JavaScript and AJAX, improving user experience and reducing form submission time by 40%
- Implemented version control best practices using Git, ensuring seamless collaboration within development team
- Participated in code reviews and technical discussions, contributing to improved software architecture decisions
- Troubleshoot and resolved complex technical issues, maintaining 98% application availability
- Assisted in database design and optimization, improving query performance by 30%
- Supported legacy system maintenance while implementing modern development practices

EDUCATION

06/2017 – 05/2020
Adoor, Kerala

Bachelor of Science in Computer Science
University Institute of Technology
64%
